App & Mobile- Connector

„Become even more flexible when it involves your document management!“

Get mobile access to your roXtra system with the roXtra app. You can comfortably access your documentation and optimally use your time on the road.

App | roXtra

With the app you have mobile access to your roXtra system and become even more flexible in terms of your document management! You can easily access all documents directly from your mobile device and see all the stored details about documents and folders.

Make the most of the time on business trips, on the train or at a customer site.

With the roXtra app, you can manage your tasks and confirm roXtra reading tasks while on the go. You are always up to date and with the integrated search and your favorites you always have the fastest possible access to all important documents in roXtra.

The app is optimized for the use with your roXtra DMS. The app needs a roXtra server from version 6.009 onwards with an enabled Mobile-Connector.

In case you do not work with a roXtra

system yet, you can also get to know the roXtra app with our free demo account.

The integrated roxValidator makes it simple to check that all printed documents are up-to-date.

With the roxValidator you ensure that no outdated versions of printed copies of your QM documentation are in use. Simply scan the QR Code on the existing, printed roXtra document.

Get your free trial of the roXtra App!

Download the roXtra app now and test it easily by using our free demo account.

Mobile-Connector | roXtra

To connect the app with your roXtra System you need an enabled **Mobile-Connector**. With the Mobile-Connector you can log in with your roXtra user and have mobile access to all documents in your live system.

Mobile features include:

- Login to your roXtra system
- Direct display of documents in PDF format
- Access to the documents in their original format
- Access to all stored metadata of folders / documents
- Access to your Favorites
- Access to your Personal Folder
- Managing your personal tasks including reading confirmation
- Comfortable search function

Even with mobile access your data is safe. Your data is trans-

mitted through a Secure Sockets Layer (SSL) protected HTTPS client-server connection. We use only certificates issued by internationally recognized certification agencies for this purpose.

Enable the Mobile-Connector now!

If you want to use the roXtra system on your mobile devices, we are happy to set up the Mobile-Connector for you.
