Flowchart Designer for your processes

Draw your processes directly in roXtra Documents

Since the publication of ISO 9001:2015 at the latest, the process-oriented approach has increasingly become the focus of QM and management. The description of key figures, responsibilities, inputs and outputs represents new requirements for many - which you can implement transparently and in an integrated manner with the roXtra Flowchart Designer.

Input

roXtra Flowchart Designer

Organizational charts

Output

The right documents in the currently valid version in the right place at the right time

Clear responsibilities within the processes and approval workflows

Supporting employees and the continuous improvement process

Consistent, standard-compliant documentation for seamless traceability and successful auditing

More efficient distribution and communication of relevant information and changes

Easy, intuitive handling

You can choose from a wide range of styles, shapes and colors to depict your processes. Separate templates are available for various basic formats such as flowcharts, swimlanes, organization charts or mind maps, which already provide the basic structure and make it easier for you to create the processes.

Direct integration of various objects

Store the associated forms and documents from your roXtra documentation directly for the individual process steps. roXtra fields can also be integrated into the processes and are automatically updated as database fields. You can also link to external content.

Easy access for your employees

Your employees can create processes directly in roXtra or run through a review and approval workflow. Other local programs, such as MS Visio, are not required. Thanks to the web-based access, the Flowchart Designer can be used at any time and from any location, making you independent of locally installed applications in future.

Secure access to current process version

The reading view is displayed directly in your roXtra browser. This allows you easy and secure access at all times and ensures that your employees can only ever see and edit the current version of a process. You can also export the charts and illustrations you have created as PDF files. The Flowchart Designer therefore provides you with additional support for your standard-compliant QM documentation.
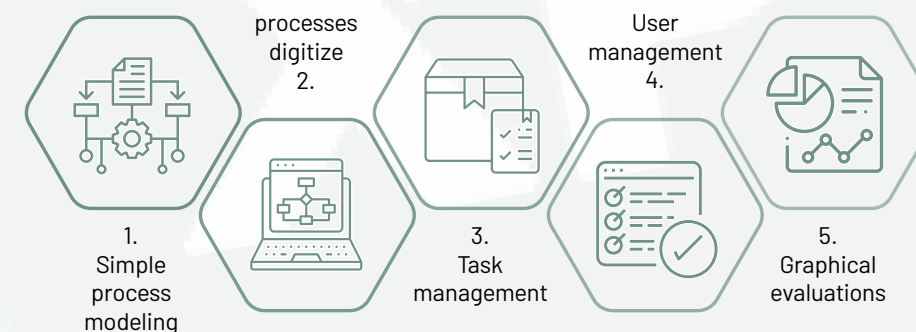

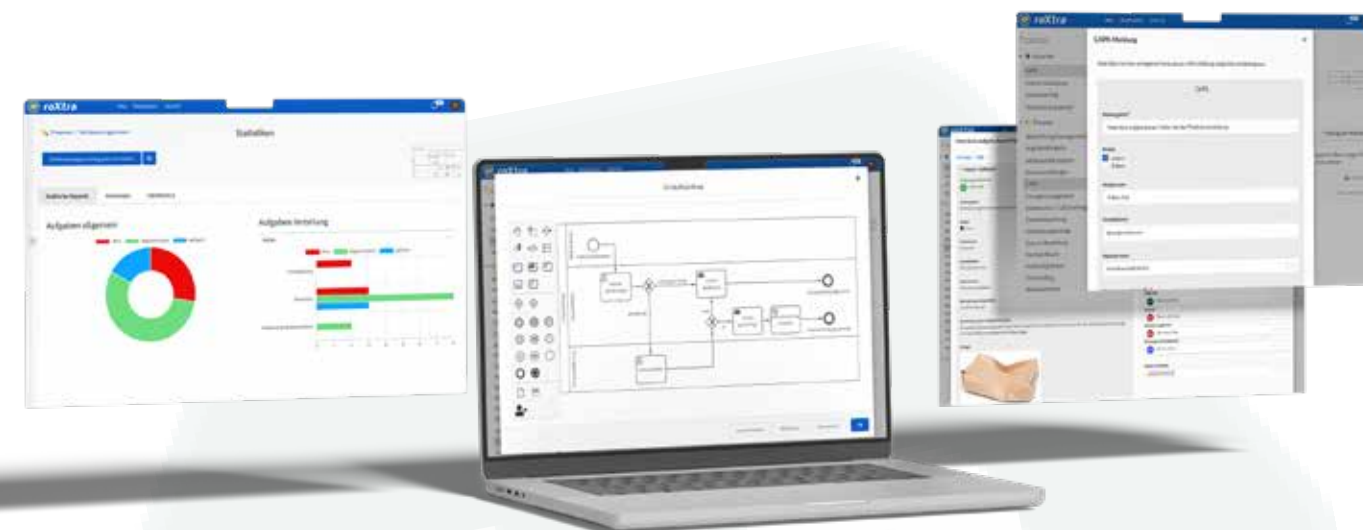

roXtra Processes

Do you not only want to visualize your processes, but also execute them?

roXtra Processes

roXtra Processes is a process management tool for the effective structuring, digitalization and automation of your business processes. Make the flow of information and tasks in your team independent across locations and optimize your business processes:

1.
Simple
process
modeling

processes
digitize
2.

3.
Task
management

User
management
4.

5.
Graphical
evaluations

Create individual input masks with form fields (e.g. checklists, drop-down fields or radio buttons), define the relevant responsibilities and automate notifications to the people involved. They can fill in the forms directly in the roXtra process management tool and forward them for processing, approval or release - without media discontinuity.

A selection of possible processes

Vacation requests	Task management	Kanban board
Invoice audits	Order processing	Data protection notification
Purchase orders	Employee onboarding	Complaint management
CAPA	Travel expense accounting	Change management

What existing users say about the **roXtra software**
