roXtra Documents within the modular structure of the digital quality management software

Our modular QM software is like a digital quality manager that supports you in becoming better and better: **roXtra** combines quality management, dynamic process management and holistic risk, audit and action management in a single system and helps you to implement your projects and tasks more effectively, safely and economically.

Declaring war on paper chaos

All important documents centrally in one place

Employees can spend up to 20 percent of their working time searching for information. The „paperless office“ is only rarely a reality.

Apart from unnecessary costs, the lack of information is one of the most common causes of dissatisfaction in the workplace.

With the roXtra Documents module, you can say goodbye to paper chaos and move towards centralised, standards-compliant documentation and digital knowledge transfer for your entire company. The system offers a wide range of options to make your document management intuitive and effective.

The modules of the QM software roXtra at a glance

roXtra Documents

The digital solution for standard-compliant and audit-proof document management.

roXtra Risks

Identify risks precisely, analyze them effectively and minimize them effectively.

roXtra Processes

Your software for executable and automated business processes.

roXtra Actions

The central instrument for continuous improvement.

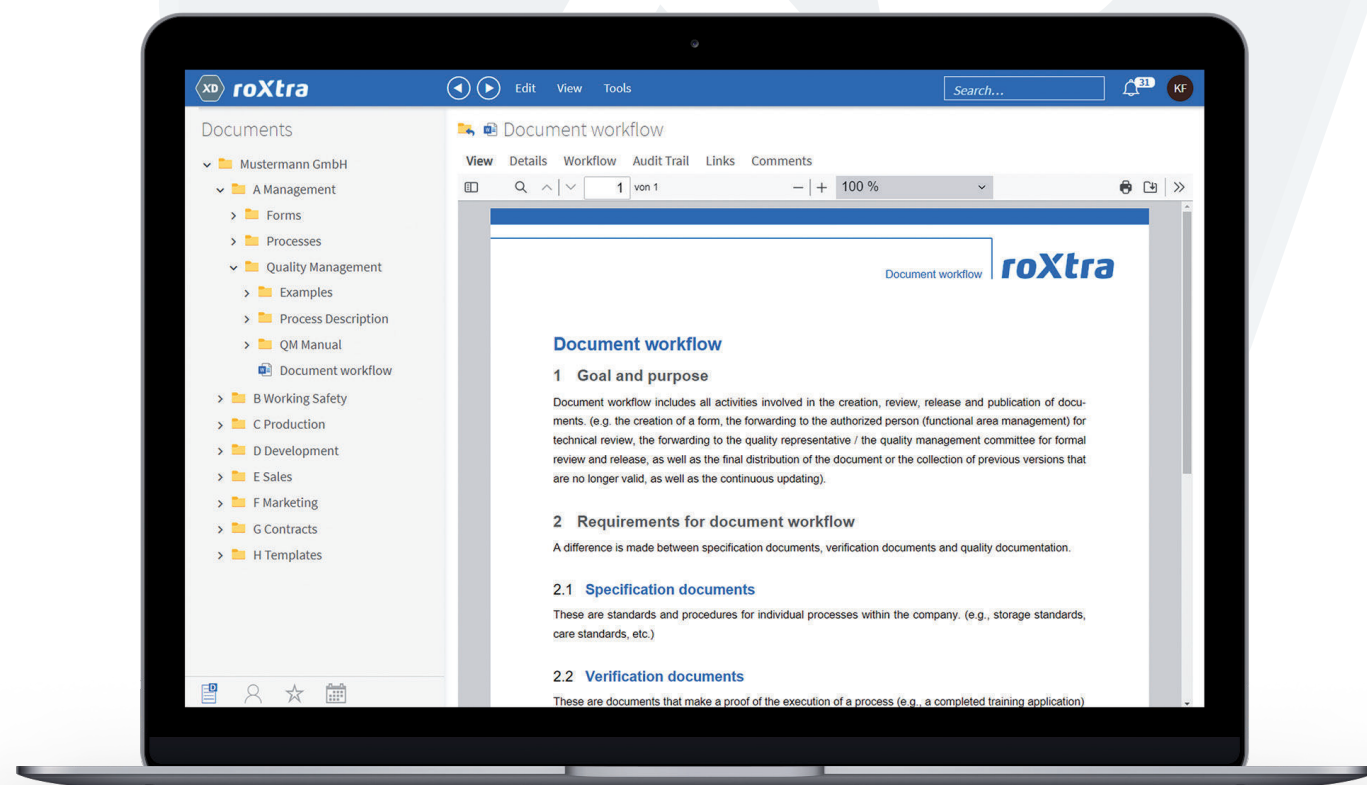

roXtra Audits

Plan and document your audits effectively.

Digital document workflow for your standards-compliant QM

Control and manage your quality management documents with individual workflows for all standards and regulations.

Your advantages at a glance

Quality

- Documentation that is always up-to-date
- Audit-proof archiving
- Reduction of errors through the „4-eyes principle“
- Clear traceability

Expenses

- Time savings due to automated workflow processes
- Problem-free transfer of existing documentation
- Future-proof investment due to latest technologies and regular updates

Motivation

- Simple UI with a modern design
- Editing of documents in familiar MS Office applications
- Direct influence of improvements through suggestions
- Improved interdepartmental communication

Continuous improvement

- Faster response times
- Location-independent access via browser
- Clear and transparent release and management processes

Our users are very satisfied with the document management with roXtra. The sample documentation was very helpful for us as „validation beginners“, especially for the first software validation. Based on our experience, we would recommend this documentation to other companies.

Catherina Katschke
Project Manager of Quality and Risk Management Unit,
Universitätsklinikum Ulm

Standards-compliant control through individual workflows

With an automated release and control process, you determine how a document is routed through your company and who is assigned which tasks within the workflow (e.g. for editing, review or release). You can achieve this by assigning an individual workflow to each document type. The tasks arising from the workflow are automatically generated by roXtra Documents and distributed to the responsible persons. In this way, the release and review process is transparent at all times. Resubmissions also ensure regular review and updating of documents. For document processing, you retain your familiar working environment (e.g. MS Office).

Central knowledge management

roXtra Documents is web-based. This means that you and your employees have access to the valid version of your digital documents, such as your QM manual at any time, regardless of location. A variety of interfaces facilitate the fast and uncomplicated transfer of data. In addition, format templates ensure the uniformity of your documents and thus accelerate the absorption of information.

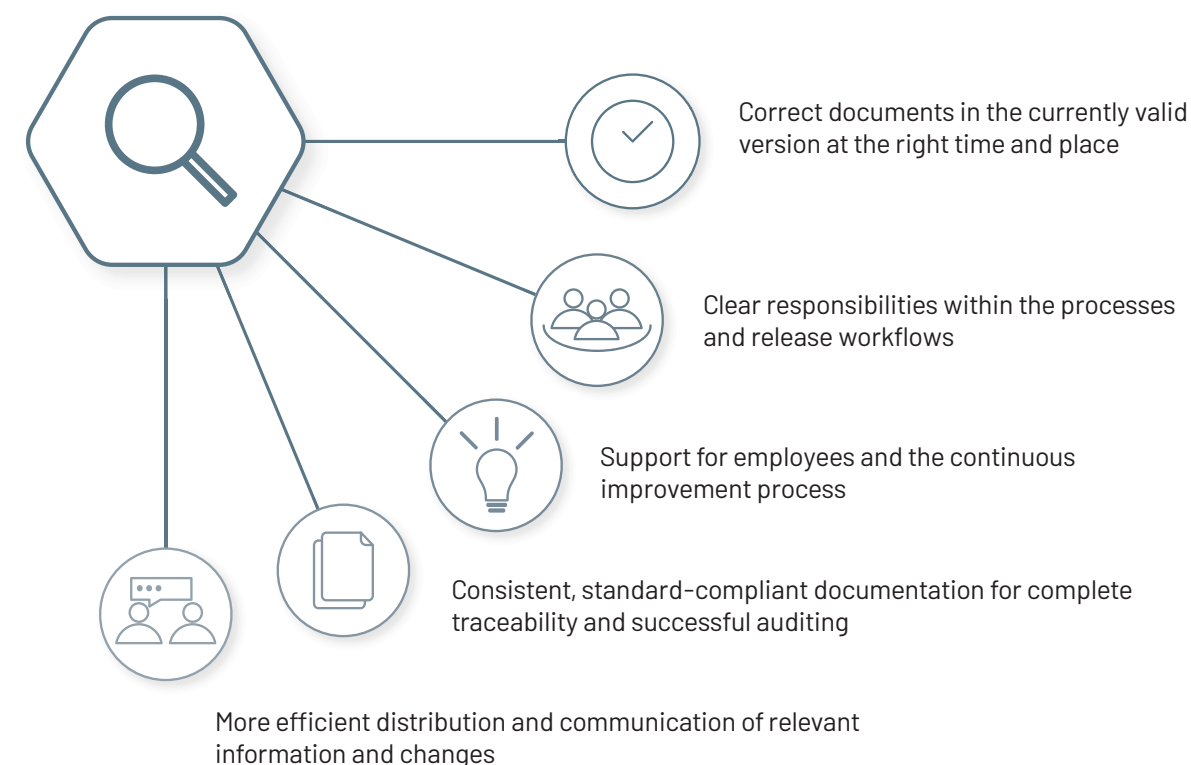

Compliant archiving and auditing

roXtra Documents ensures employees can only ever work with the latest version of a document. Revisions are processed in the background and are only available in the operational environment after release. With the automatic assignment of revision numbers, roXtra Documents offers a easily traceable QM documentation - an invaluable advantage for certification or audits (XA).

Find information or documents quickly

A lot of time can be saved in daily work if documents can be found quickly and easily. This is ensured by an integrated full-text search that encompasses both the content of the documents and their stored metadata. With the advanced searches, result lists can be even more precise. The tree-based structure helps users to easily navigate through their search results.

Simple, cross-system user management

The QM software enables simple, efficient and detailed assignment of rights at both the group and individual level. This is particularly advantageous in fast-growing companies and IT landscapes. With the help of a rights matrix, you can easily keep track of the assignment of rights. For systems with a large number of users, the connection to various identity providers (Active Directory, Azure AD or Okta) is an additional advantage.

Process-oriented document workflow

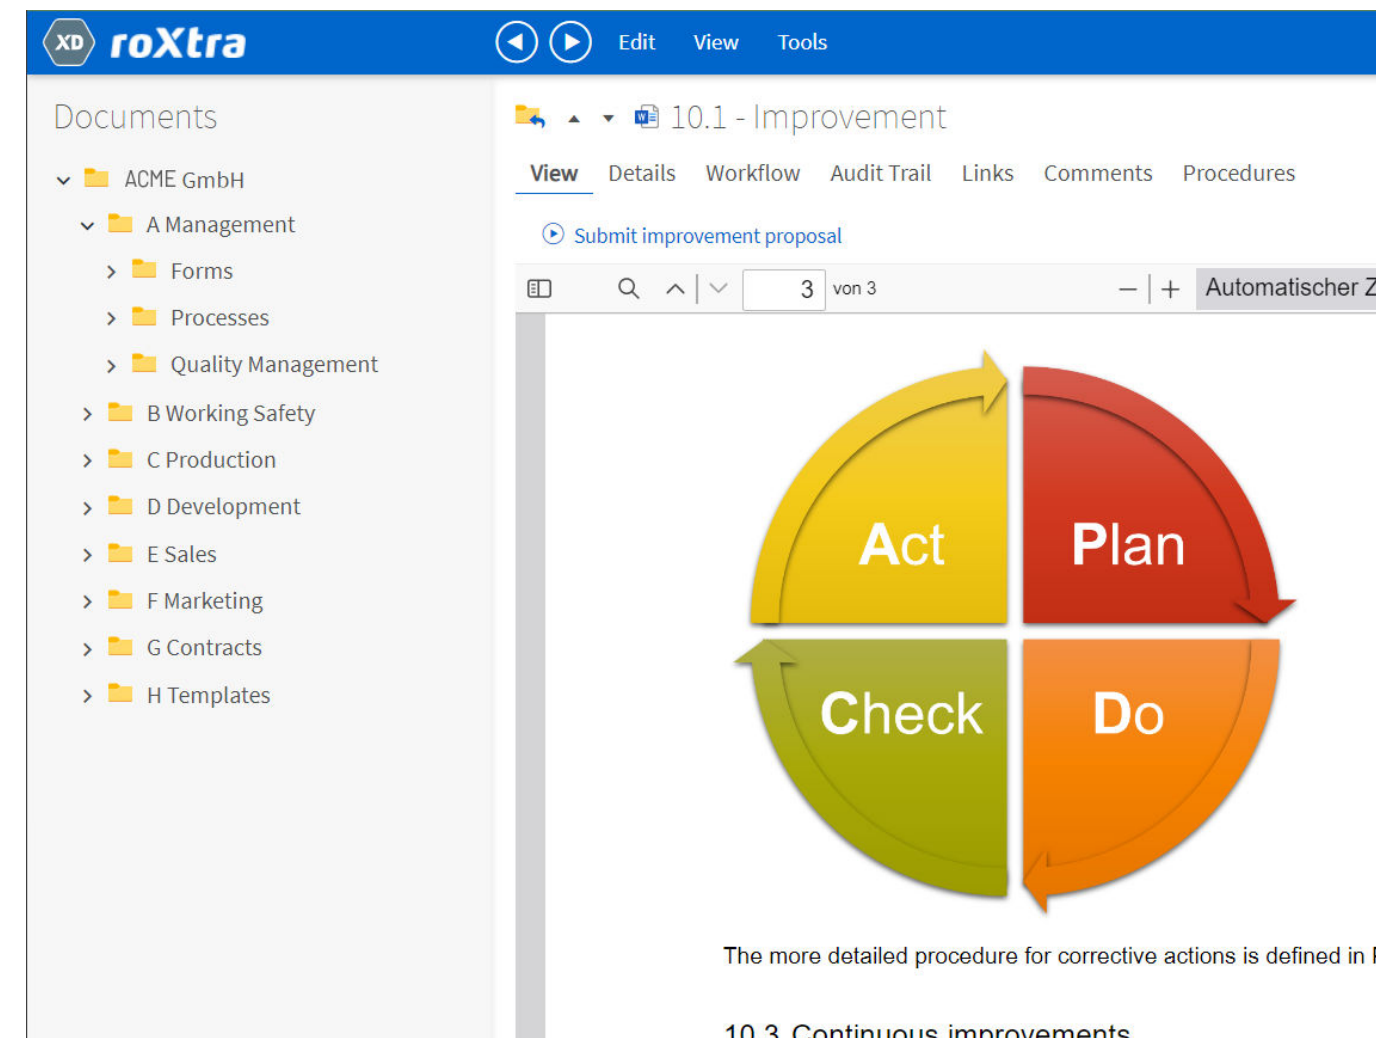

A core task of quality management is to maintain an overview of responsibilities, tasks and decisions, as well as the relationships between various company processes. roXtra supports you by harmonising document workflows and your business processes. You can directly assign related forms and documents to individual process steps and even link external content. This simultaneously creates transparency and a basis for high process quality.

Visualisation with the Flowchart-Designer

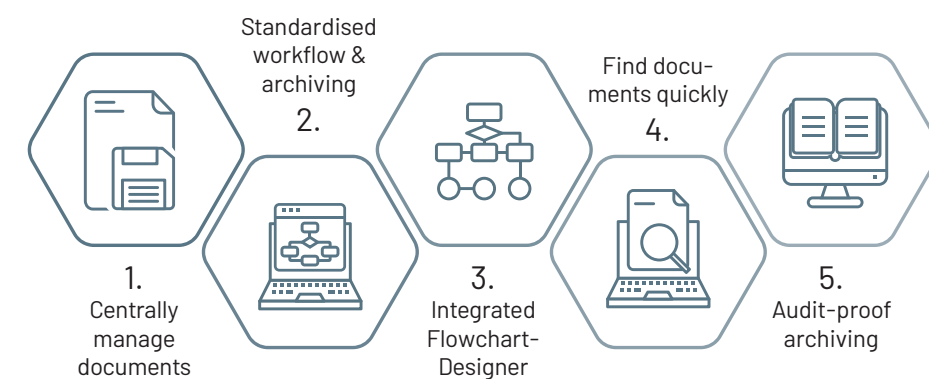

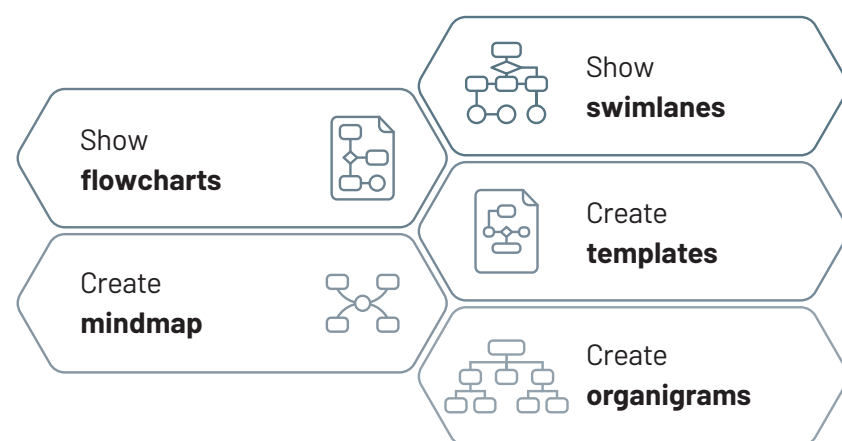

The roXtra Documents module also supports you in visualising your business processes: With the integrated Flowchart-Designer you can easily model your company organisation as well as workflows and individual business processes. For this purpose, a variety of styles, shapes, symbols and colours are available.

To aid you in easily visualising your workflows, the Flowchart-Designer offers you a wide range of tools and templates - including flowcharts, process flows, organisational charts, swimlanes, turtle diagrams and much more.

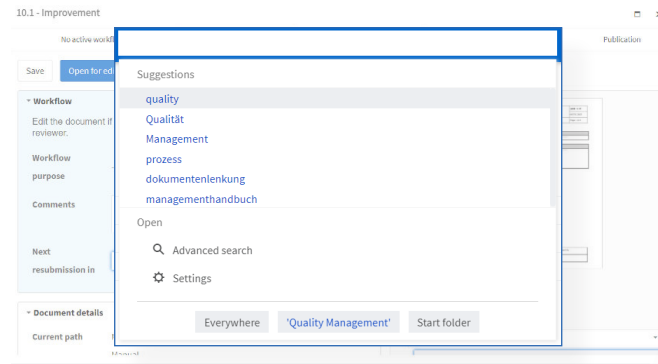

The Designer is so easy to use that you can start right away without any training.

Document view

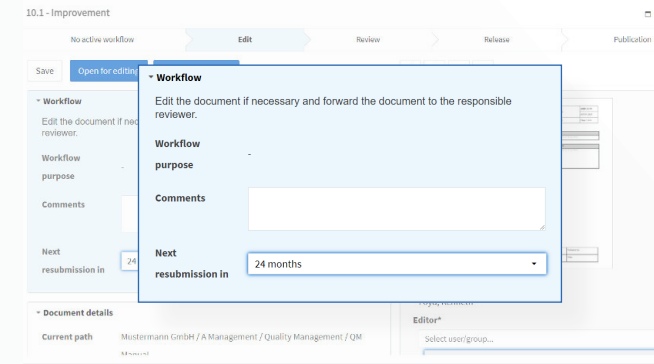

Product highlights

roXtra creates order

Search and quick access

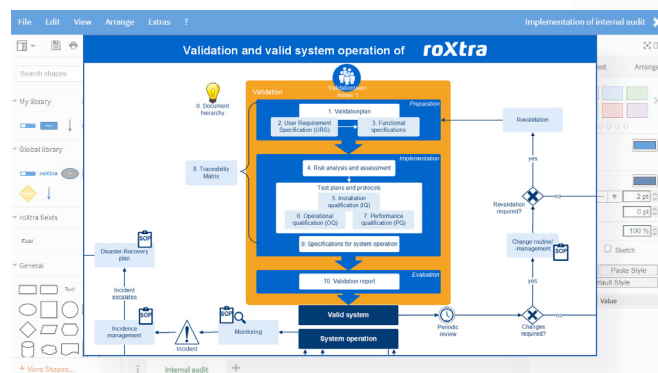

Intelligent search function with clear structure as well as field and full text search.

roXtra strengthens teamwork

Workflow control

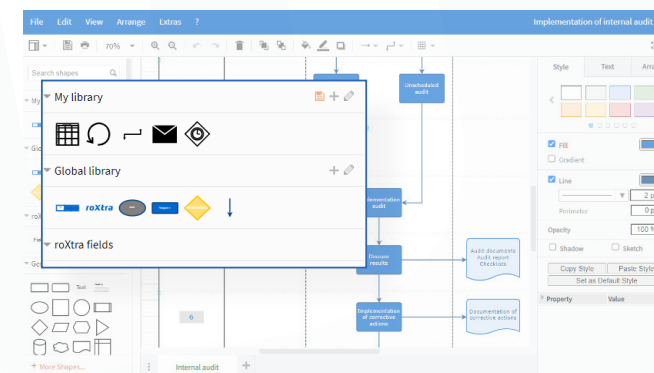

Customised workflows control the flow of documentation through the company.

roXtra fulfils GxP regulations

Software validation

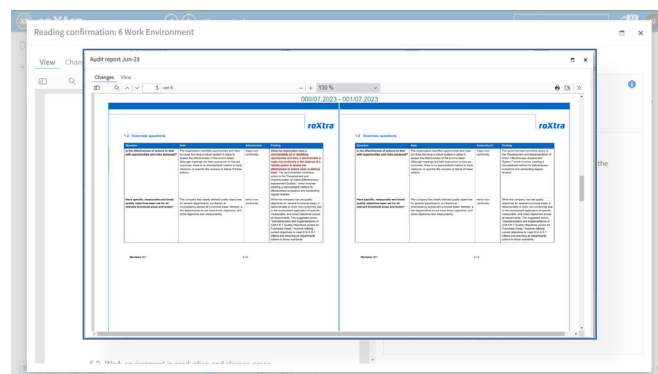

We supply you with roXtra as a GxP-compliant standard version. This minimises the qualification and validation effort for your company.

roXtra creates quality

Process orientation

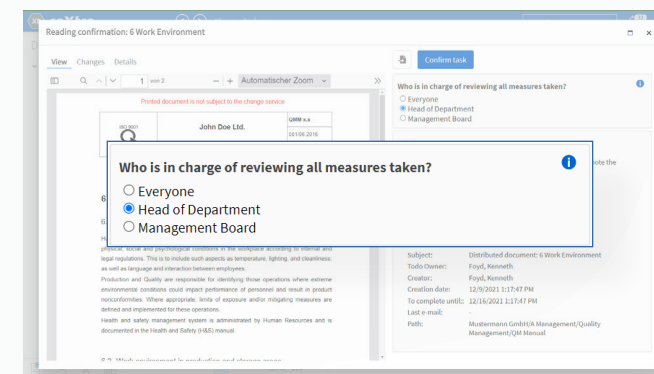

QM that adapts to your company-specific needs and processes.

roXtra creates an overview

Revision comparison

Track and compare revisions using the direct comparison of versions.

roXtra creates understanding

Extended read confirmation

Ensure that documents have not only been read, but also understood.

Extend roXtra Documents with

IDP connector

This extension minimises the effort required for user administration by allowing roXtra to communicate directly with Active Directory, Azure AD or Okta.

API interface

The interfaces of roXtra enable the integration of external documents and databases. This allows automatic synchronisation of data with other systems.

CD builder

The roXtra CD-BUILDER allows to export documents including the roXtra user interface to an „offline format“ - for example to a hard disk, CD or DVD.

Contracts

Organise and manage your contracts in a secure digital format- from contract recording to deadline monitoring, through to audit-proof archiving. In this way you have all deadlines and costs at a glance.

Import scanner

Scan your documents directly into roXtra, allowing for quick archiving of paper records.

Mobile connector

Get mobile access to your roXtra system with the roXtra app. You can conveniently access your documentation and make the most of your time on the road.

How to make
roXtra Documents
even better...

With optimal extensions

For interfaces, user administration, storage, mobile working, the visualisation of processes and contract overview.

What existing users say about the **roXtra Software**
