roXtra Audits

The audit management software
that supports you in the develop-
ment of your business potential

roXtra Audits within the modular structure of the digital quality management software

Our modular QM software is like a digital quality manager that supports you in getting better continuously: roXtra combines quality management, dynamic process management and holistic management of risks, audits and actions in a single system that helps you to implement business processes more effectively, more securely and more economically.

Intuitive and easy to use, our software makes Quality Management enjoyable and under-standable for managers and employees alike, helping organisations to achieve their goals.

The modules of the QM software roXtra at a glance

- XD roXtra Documents**
The digital solution for standard-compliant and audit-proof document management.
- XR roXtra Risks**
Identify risks precisely, analyze them effectively and minimize them effectively.
- XP roXtra Processes**
Your software for executable and automated business processes.
- XM roXtra Actions**
The central instrument for continuous improvement.
- XA roXtra Audits**
Plan and document your audits effectively.

Prevention instead of complaints

Check conformities and take actions

Audit management is an efficient tool for verifying the fulfilment of defined corporate goals and requirements.

This requires the design and implementation of an audit programme. When conducting an audit, internal non-conformities and potential areas for improvement can be identified. The resulting actions allow for the correction of potential deviations from standards.

roXtra Audits supports you from scheduling the inspection date and carrying out the audit with a questionnaire defined by you, to the follow-up and evaluation of the results.

Whether DIN EN ISO 9001, ISO 13485, ISO 14001, ISO 15224 or other regulations such as the Supply Chain Act: roXtra helps you to fulfil requirements.

Identify potential for improvement and realise them effectively

Plan and document your audits effectively and uncover optimisation potential to ensure sustainable success.

Digital audit management

Just a few steps to a successful audit

Plan and prepare audits

Thanks to the intuitive form, you can plan a new audit with just a few clicks: Enter all the relevant data, such as the area to be audited, the type of audit planned (internal or external audit, etc.), the auditor in charge and the planned period of the inspection date. The information can be adapted individually to your company structure.

Thanks to AI integration, texts such as audit questions, descriptions, email templates etc. can be generated automatically.

Form for planning a new audit

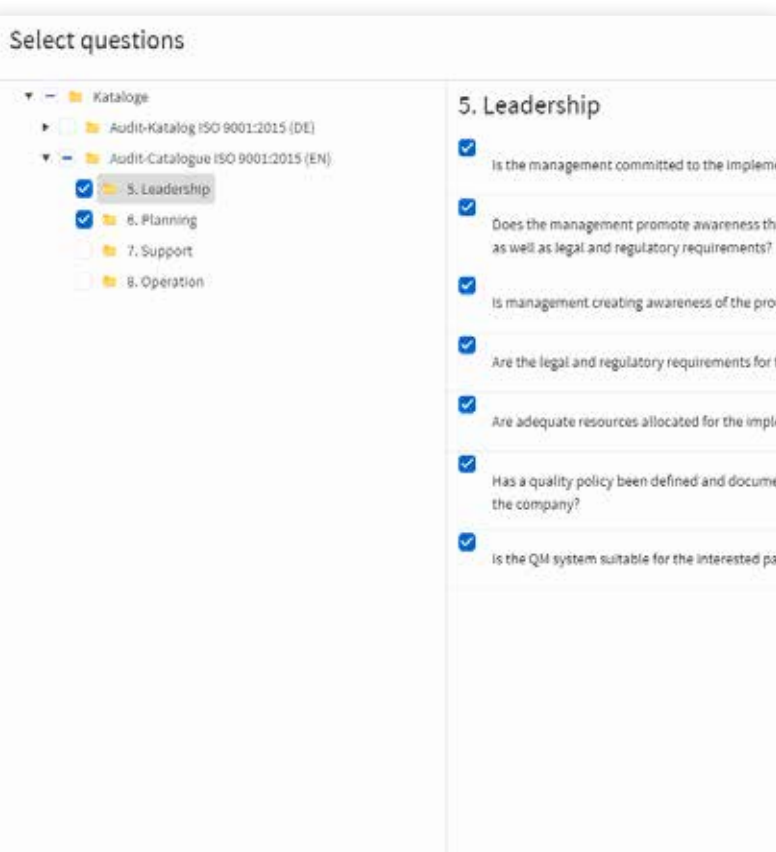

Question catalogue and criteria catalogue

During the creation of a new audit, you have the possibility to select questions from a global question catalogue, to reuse questions from a completed audit and to add new questions for the upcoming audit. Existing lists can be easily imported.

Perform audits online, remote or on site

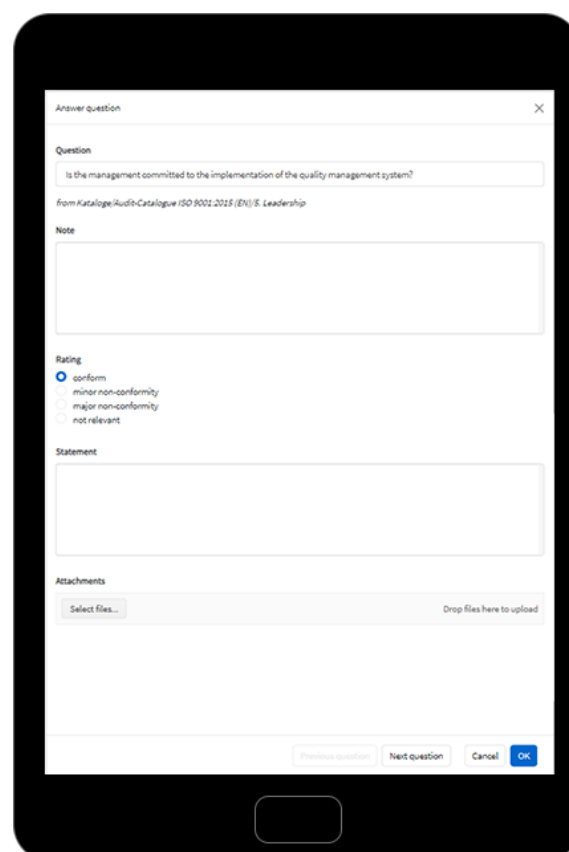

Thanks to the offline function, answering the question catalogue can take place on your computer or tablet - even without an internet connection.

In addition, remote audits are supported by the system: Provide your auditor with all the necessary documents. Your documents (XD) can be exported as a collective PDF and the actions taken (XM) as a report and then stored in the corresponding audit.

The screenshot shows a web interface titled "Select questions". On the left, there is a tree view under the heading "Kataloge". It contains two main folders: "Audit-Katalog ISO 9001:2015 (DE)" and "Audit-Catalogue ISO 9001:2015 (EN)". Under the EN folder, several sub-items are listed: "5. Leadership", "6. Planning", "7. Support", and "8. Operation". The "5. Leadership" item is selected and highlighted. On the right side of the interface, under the heading "5. Leadership", there is a list of questions, each preceded by a blue checkmark in a box. The questions are: "Is the management committed to the implementation of the quality management system?", "Does the management promote awareness throughout the organization as well as legal and regulatory requirements?", "Is management creating awareness of the requirements of the quality management system?", "Are the legal and regulatory requirements for the quality management system known?", "Are adequate resources allocated for the implementation of the quality management system?", "Has a quality policy been defined and documented by the company?", and "Is the QM system suitable for the interested parties?".

Import global questionnaire

The screenshot shows a tablet displaying the "Answer question" interface. At the top, there is a close button (X). Below the title, the "Question" section contains the text: "Is the management committed to the implementation of the quality management system?" and a smaller line below it: "from Kataloge/Audit-Catalogue ISO 9001:2015 (EN) 5. Leadership". Below the question is a "Note" section with a large text area. Underneath the note is a "Rating" section with four radio button options: "conform" (which is selected), "minor non-conformity", "major non-conformity", and "not relevant". Below the rating is a "Statement" section with a large text area. At the bottom of the form is an "Attachments" section with a "Select files..." button and a "Drop files here to upload" area. At the very bottom of the screen, there are four buttons: "Previous question", "Next question", "Cancel", and "OK".

Evaluation of questions via web-based access

Convenient audit procedure

The audit questions can be answered quickly one after another. Shortcuts support you in entering standard answers such as „satisfactory“ or „not audited“ with one click. In addition, you have the option to interrupt the audit at any time and continue answering at a later date.

The clear presentation enables a direct overview of the status and rating of the individual questions.

Derive actions and link them

During the audit, necessary actions (XM) for non-conformities or potential improvements can be recorded directly in the audit screen. This effectively documents all steps for continuous improvement - without any media breaks.

Even after the audit has been completed, roXtra reminds the responsible persons to check the efficiency of the recorded actions.

Perform an audit

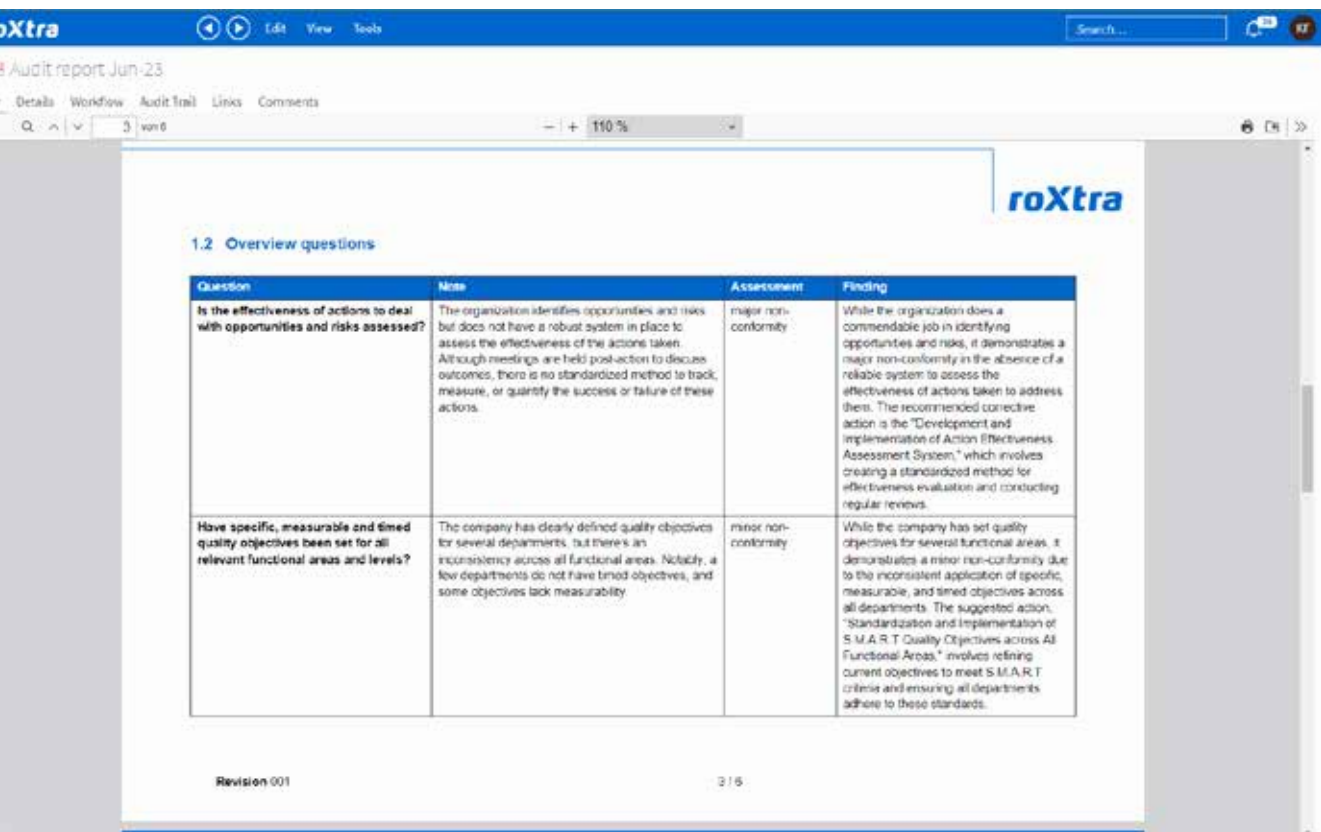

Efficient audit follow-up

In the „Audit follow-up“ step, you can define the audit result, export the audit report as an Excel, Word or PDF file and save it as an attachment. In addition, you can record a summary with the relevant non-conformities, derive further measures, record your own notes or recommendations if required and plan a follow-up audit.

Clearly arranged dashboard

All audits and their states are displayed graphically in the dashboard. In addition, the convenient calendar function offers a quick insight into upcoming audits.

Another feature of the dashboard is the audit list, which has individual filter options. This allows you to keep track of all data relevant to you.

Track valuation histories and trends

Your advantages at a glance

Audits

- Intuitive preparation of audits by form template
- Conveniently use the global questionnaire as a template
- Fast audit preparation with AI support
- Efficient answering of question catalogue using shortcuts
- Audits can also be performed without an internet connection (offline mode)

Everything in view

- Clear presentation of audit progress
- Provide audit report easily as Excel, Word or PDF file
- Audit list with individual filter options
- Audit results are clearly recorded

Actions

- Create actions directly from the audit
- Responsible persons for implementation are informed about new actions
- Simple linking of existing actions (XM)
- Automated efficacy test

Compliance

- Compliance with storage periods
- Data protection compliant
- Clear allocation of tasks and responsibilities
- Automatic recording of all changes in audit trail

As Quality Management Officer at Roxtra GmbH, I made it my mission to test the module in terms of user-friendliness. The audit management tool is an essential component of my daily work.

Daniel Groeger
Quality Management Officer, Roxtra GmbH
